## **EXAMINER'S COMMENT**

### ***Drawings***

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the current drawings, though acceptable for examination, are considered to be informal and of poor image quality. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Reasons For Allowance***

2. The following is an examiner's statement of reasons for allowance: The closest prior art is shown by U.S. Patent No. 6,164,779 to Volk. Volk '779 discloses a gonioscopic contact lens that is capable of imaging the anterior chamber angle of the eye. Volk fails to disclose or render obvious an ophthalmoscopy lens system comprising a first contact lens group and a second lens group wherein the second lens group contains a hole extending along the optical axis of the lens system such that, in addition to viewing the anterior chamber angle through the lens groups, a view of the retina is provided through said hole in the second lens group.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
